Record.
Stream.
Share.

For any law enforcement agency or child advocacy center seeking a simple yet complete system to record interviews, StarWitness® Interview Room has been designed with your reality in mind. We've chiseled every feature down to its simplest functionality—record, stream, and share footage, with a web interface that lets you view interviews right from your desk.

- **Online Web-Browser Access**
  Works on Edge, Google Chrome or Mozilla Foxfire.

- **Easy, Fast Downloads**
  Through the web-browser interface, reducing your need to burn DVDs.

- **Live Stream Viewing**
  Multiple viewers can log on to watch interviews from any point on the network. (The stream has a 30-min DVR window)
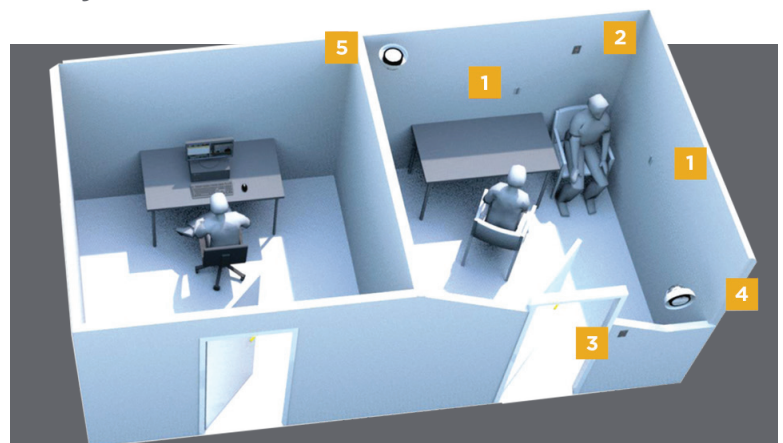

1   The microphones are close to the conversation, at head level for a seated adult on either side of the subject

2   The recording indicator light behind the subject, so the interviewer can see it at all times during the interview and know that the recorder is recording

3   The recording start button is just outside the door to the room

4   The close-up camera showing expressions and body language gives a clear view of subject's face

5   The wide-angle camera on the ceiling shows all the activity in the room
